

# Experiment No-03

# Experiment 3:

## Design and Implement web page using CSS3 and HTML5

- E.g. You will create a **small Web site reviewing products of your choice**
- **Choose a category of products, stores or services** that you are knowledgeable of. These can be **computers, cars, music players, cell phones, restaurants, salons**, etc.
- **Create a review of three or four related products from your chosen category.** The actual format of your review is up to you, but it should have the following qualities:
  - **A table, possibly summarizing features or ratings.**
  - **Links to Web sites** citing your sources (use absolute references).
  - **At least one additional page.** The contents of this page could be **your name and contact information**. Use relative references to link to any additional pages.
- Incorporate at least **one graphic or image in your Web page**. Various div and span tags with style properties. Use of CSS style rules are strongly encouraged.

# Experiment 3:

- Theory:-
- The need for CSS
- Introduction to CSS
- Basic syntax and structure
- Three ways to insert CSS
  - External Style Sheet
  - Internal Style Sheet
  - Inline Style Sheet
- Explanation of <div> tag and <span> tag with example.
- Attach print out of source code and output screen.(Don't take colored print outs.Attach black and white print out.)
